ANALYST NOTE

Hera local LLM

This backtest failed catastrophically due to a 0% win rate and a single loss erasing the entire account. The strategy proved ineffective on DOGE/USD, suffering a 20.78% drawdown with a negative Sharpe ratio of -0.83. With only two trades, statistical significance is nonexistent, rendering any performance metrics meaningless for live deployment. Do not deploy this signal logic on high-volatility assets until a larger sample size confirms robustness.
