ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1374 strategy on LPG generated a nominal 41.35% ROI, yet the statistical significance is negligible due to only three completed trades. A 21.82% drawdown indicates substantial volatility risk that contradicts the modest 1.13 Sharpe ratio. The high win rate of 66.7% appears anomalous given the tiny sample size and requires validation on a longer historical window. We must expand the test dataset to at least 50 trades to confirm whether this alpha persists or was a lucky outlier.
