ANALYST NOTE

Hera local LLM

The ONDO/USD momentum test yielded an 18.43% gain with a 0.84 Sharpe ratio, yet the 33.3% win rate and 28.15% drawdown reveal severe fragility. Extreme reliance on only three trades renders the statistical sample insufficient to validate the strategy's robustness. While the final capital reached \$11,846.44, the high volatility suggests the entry logic lacks adequate filters for adverse market shifts. A concrete next step involves increasing the trading frequency to generate a larger dataset and validate performance across different market regimes before live deployment.
