ANALYST NOTE

Hera local LLM

The EVO_GG1RSISNIP_v1561 strategy on VOXR underperformed with a negative ROI of -2.01% and a Sharpe ratio of -0.05, indicating the model generated value during the sample period. With only three trades executed, the statistical signal is extremely weak and lacks the robustness required for institutional deployment. A maximum drawdown of 11.32% suggests the entry logic failed to filter adverse volatility spikes effectively. The current win rate of 33.3% confirms the strategy is losing more often than it wins on this specific asset. We must expand the backtest horizon or adjust parameters before considering live allocation.
