ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v2179 strategy generated an 18.35% return on ASC, but the 17.18% drawdown and low Sharpe ratio of 0.82 indicate high volatility relative to gains. Statistical confidence is critically low due to only three trades, rendering the 66.7% win rate unreliable and prone to overfitting. The strategy lacks robustness for live deployment as a single trade sequence cannot validate trend persistence or adverse market shifts. Next, run a walk-forward analysis with expanded parameters to test stability across different market regimes before considering live execution.
