ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v2110 backtest on RDN is a complete failure, showing a negative ROI of -5.59% and a Sharpe ratio of -0.31 with zero winning trades. With only three total trades, the statistical significance is negligible, rendering the 14.78% drawdown meaningless for generalizing performance. The strategy lacks any viable alpha, as capital eroded from \$10,000 to \$9,440.84 without generating a single profit. Immediate next step is to discard this configuration and test a simpler mean-reversion approach with wider stops to reduce noise sensitivity.
