ANALYST NOTE

Hera local LLM

The EVO_WEBIDEA_v2434 strategy on VOXR failed, delivering a negative ROI and a Sharpe ratio of -0.05 due to a win rate of only 33.3%. With just three trades, statistical significance is absent, rendering the 11.32% drawdown an outlier rather than a systemic flaw. The sample size is too small to confirm parameter inefficiency or market regime mismatch. I recommend expanding the backtest horizon or adjusting filters to validate viability before live deployment.
