ANALYST NOTE

Hera local LLM

The EVO_EVOEVOEVOE_v548 strategy on RDN failed catastrophically, delivering a negative ROI and zero winning trades. With only three executed trades, the sample size is statistically insignificant, rendering the negative Sharpe ratio and sharp 14.78% drawdown unrepresentative of long-term performance. We cannot validate the signal logic without expanding the testing window to filter out this specific market noise. The immediate next step is to re-run the backtest with a wider date range and adjusted volatility filters before redeploying capital.
