ANALYST NOTE

Hera local LLM

The backtest for RDN under EVO\_EVOEVOEVOE\_v1740 yielded -7.07% ROI with a -0.40 Sharpe, indicating poor risk-adjusted returns. The 20% win rate across only 5 trades lacks statistical significance, making results unreliable. A 15.29% max drawdown further erodes capital efficiency. Immediate next step: expand the sample size to at least 50+ trades or optimize strategy parameters to improve win rate before deployment.
